“OX have brought out this new Thunder blade, and I can say, after using it for a month, doing renos, and cutting through materials that hold existing nails, it's been unreal. We haven't broken a tooth once, haven't chipped. We've been running that for 2 reno jobs and throughout both, they just haven't failed us.”

Andrew | EST Building

“The new OX circular saw blades, made in Australia, perfect for every possible need I have. High quality and durable. Nails stand absolutely no chance.”

Alex | Stony Creek Construction

“We've been using the new Lightning blades from OX, and to be honest, they're just so good, so quick. Saves battery on our saws, allows us to get home quicker, do more. Definitely the quickest blades we've ever used. So much quicker. Rate this blade overall, really good.”

Alex R | EST Building
